

# An Invitation to an Educational Information Session

## Stuart's EduWeb!

### ...One Year Later

EduWeb has now been available for one year. Some schools have been using it from the beginning. Some have only just started to use it. Many are not using it at all.

- ☞ What have we learned?
- ☞ How can we make it better?
- ☞ What are the issues?

Twelve months ago, a utility called **EduWeb** was developed to introduce the concept of student-centred intranets to all schools in NSW. To launch the utility, an information session was held at Oatley Senior High School, attended by about 150 teachers. At that stage nobody really knew exactly what impact a student-centred intranet would have on schools, students, teachers, teaching and learning. A year down the track, we've learned plenty.

- EduWeb reinforces:**
- ☞ Project-based Learning
  - ☞ Teacher collaboration
  - ☞ Web Publishing & Multimedia
  - ☞ Student-Centred Learning
  - ☞ Technology in all KLAs
  - ☞ Real World connections

A **Student-Centred Intranet** can be one of your school's most powerful learning tools. It will enable achievable and effective **Project-based Multimedia Learning**.

This follow-up seminar is presented by **Stuart Hasic**, District Technology Adviser, St George. Other guest speakers include **Greg Fitzgerald**, Principal, Woronora River PS (*pioneer of Student-Centred Intranets*) and **Joann Sayers**, Executive Teacher, Bellevue Hill PS (*pioneer digital portfolios*).

#### **EduWeb: One Year Later - a free information session**

where : **Oatley Senior High School**, cnr Oatley Pde & Hurstville Rd, Oatley

when : **Wednesday, 13 November 2002 - 4pm sharp** till 5:30pm (approx.)

rsvp : Bookings essential via e-mail to **hasics@det.nsw.edu.au** by Friday 8/11
